

Greenward: A New Crew

An illustrated offline guide
for a new garden crew member

Nguyen Thanh An
WPF slideshow and screen capture tutorial

Story flow and navigation

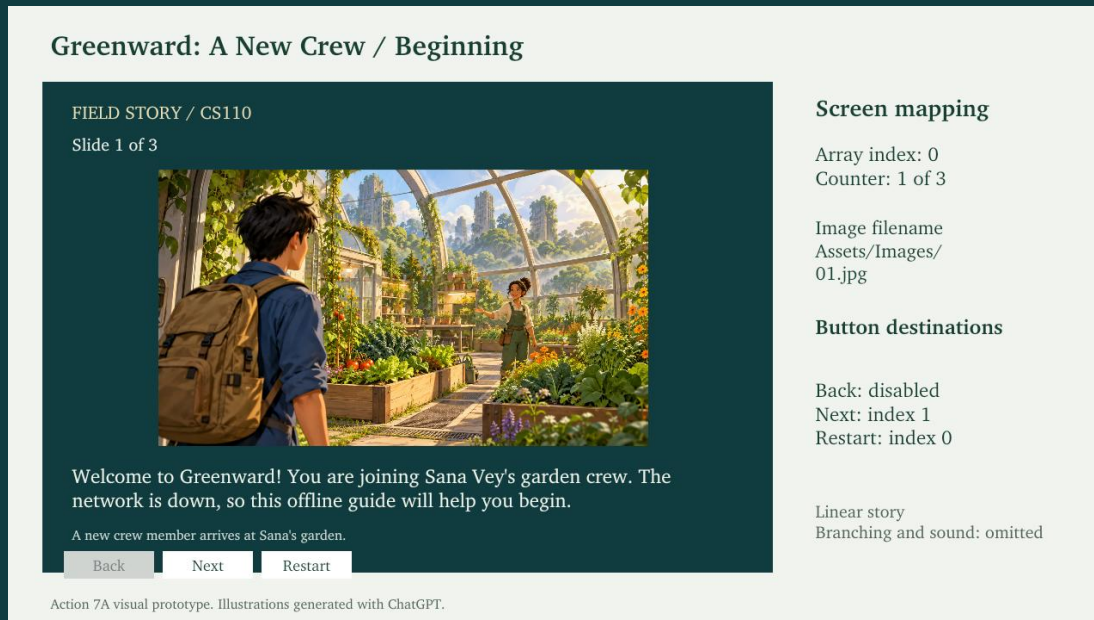

Back returns to the previous index. Restart calls ShowSlide(0).

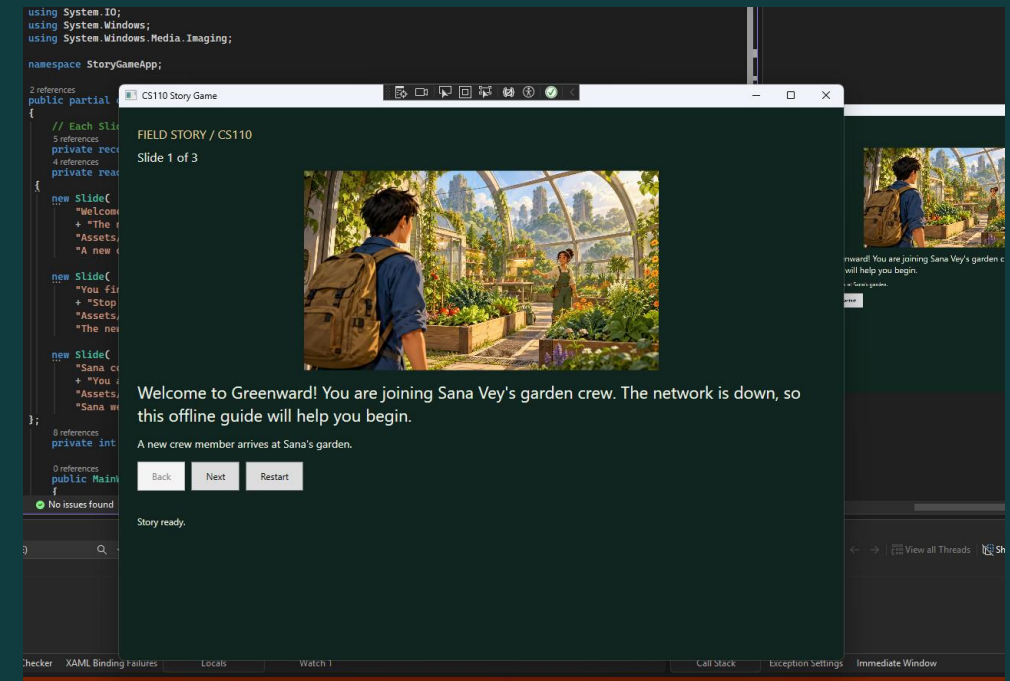

ShowSlide checks the index before changing the story.
Back is disabled at index 0. Next is disabled at index 2.
Text, image and description come from the same Slide record.

Prototype and working app

7A visual prototype

7A running app

The app follows the planned story, images and navigation.
7B adds a capture preview and Save PNG / Clear controls.

One method: cancelling Save

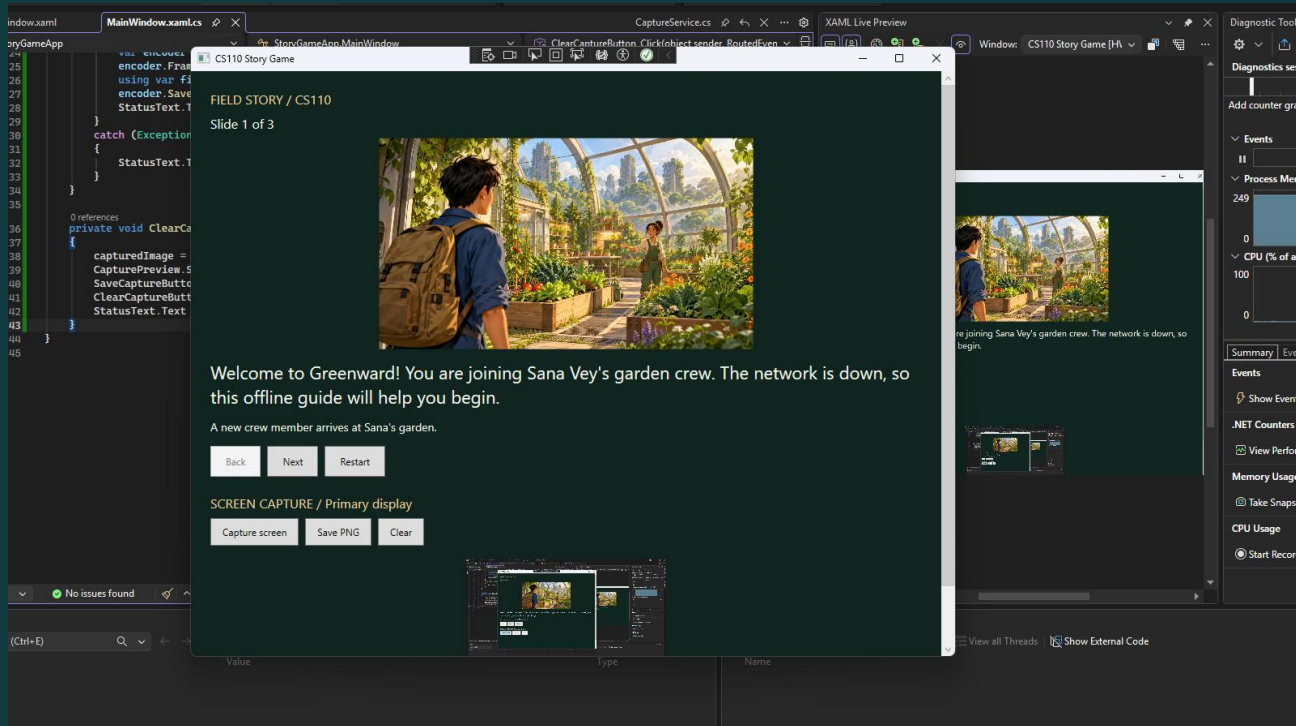

MainWindow.xaml.cs / SaveCaptureButton_Click

```
if (capturedImage is null) return;

if (dialog.ShowDialog(this) != true)
{
    StatusText.Text = "Save cancelled. Preview kept.";
    return;
}
```

Cancel returns before the encoder writes a file.
The method leaves capturedImage, preview and currentSlide intact.

Screen capture and PNG evidence

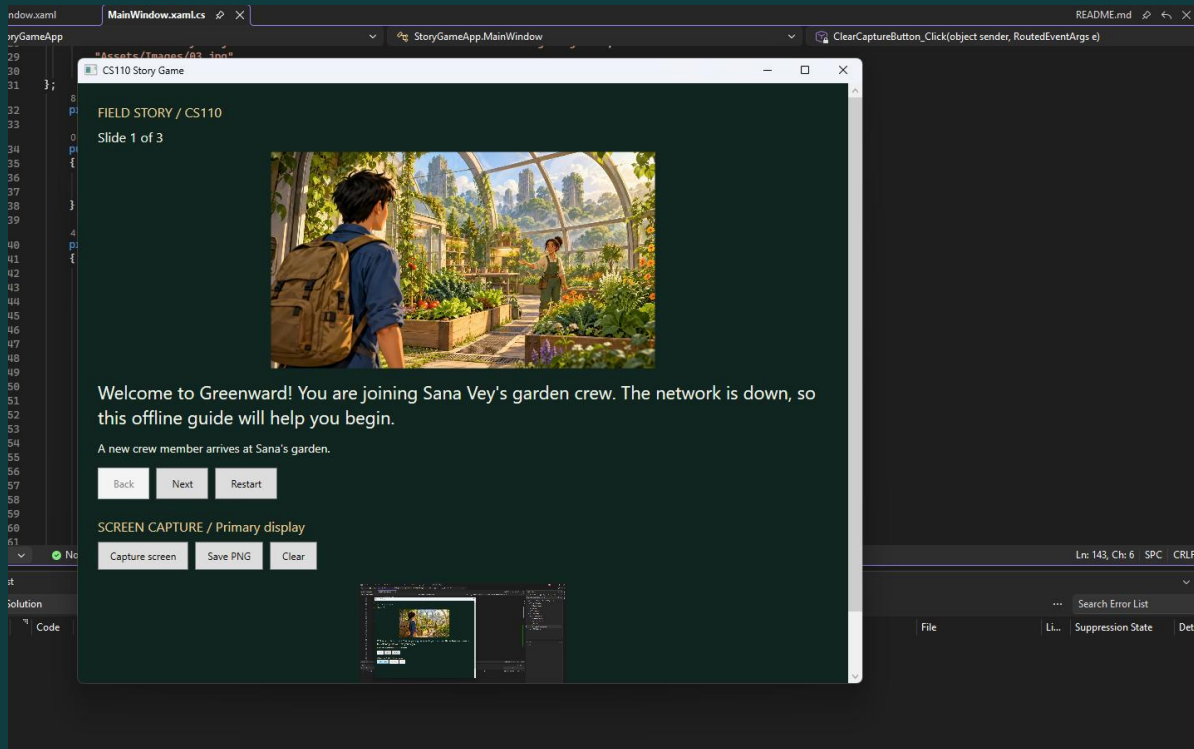

CapturePrimaryScreen()
returns BitmapSource.

CaptureButton_Click stores it
and updates CapturePreview.

Save encodes that stored image
as a PNG file.

Saved output: Evidence/7B/story-capture.png

Tests and the AI check

Recorded 7B results: Pass
Save disabled before Capture
Capture and reopen saved PNG
Cancel keeps preview and slide 2
Clear disables Save
Capture again and story navigation

Cancel tested on slide 1 (currentSlide = 0).
Preview kept; slide unchanged; no new file
created.

Contributions and handoff

Student work

Integrated the course starter and capture snippets.
Added the story images and ran the 7A/7B checks.
Recorded evidence and pushed the GitHub checkpoints.

Credits and limits

Course: WPF starter, CaptureService and integration snippets.
ChatGPT: illustrations, prototype, explanations and documentation.
Requires Windows and .NET 10. Captures the primary display.

Release build passed: 1 succeeded, 0 failed.

Another person extracted the ZIP, built and ran the app,
tested all slides, captured the screen and saved a PNG.

Result: PASS. No repairs needed.
